SHUBHAM SHARMA

Senior Platform / DevOps Engineer · DevSecOps & Cloud Infrastructure Consultant

Pune, India · shubhs248@gmail.com · shubhs248.github.io · linkedin.com/in/shubhs248 · github.com/shubhs248

PROFESSIONAL SUMMARY

Senior Platform / DevOps Engineer with 7+ years of hands-on experience architecting resilient multi-region Kubernetes platforms, automated CI/CD/CT delivery pipelines, shift-left DevSecOps security guardrails, and enterprise observability. Proven track record supporting 60+ enterprise managed services, reducing mean time to detect incidents (MTTD) by 70%, decreasing reported vulnerabilities by 40%, and accelerating developer productivity through Generative AI enablement across GitHub Copilot and GitLab Duo.

TECHNICAL COMPETENCIES

Cloud & Orchestration:	Kubernetes (EKS, AKS), Docker, Helm, AWS (IAM, VPC, EKS, EC2, S3), Microsoft Azure, OpenShift
DevSecOps & Security:	GitHub Advanced Security (GHAS), SonarQube, Trivy, Burp Suite, Black Duck, SAST, DAST, SCA, CycloneDX SBOM
CI/CD & Infrastructure:	Terraform, Ansible, Jenkins (Declarative & Shared Libraries), Azure DevOps, GitHub Actions, CloudFormation
Observability & SRE:	Prometheus, Grafana, Splunk, Datadog, Alertmanager, ServiceNow, ITIL, Root-Cause Analysis (RCA), SLA/SLO
GenAI Enablement:	GitHub Copilot, GitLab Duo, Microsoft 365 Copilot, Prompt Engineering, Local RAG (Ollama, Chroma)
Languages & Tooling:	Python, Bash Scripting, Groovy, Linux/Unix Administration, YAML, Git, Nexus, Artifactory

PROFESSIONAL EXPERIENCE

Senior Consultant — Infosys

Aug 2026 – Present

Pune, India

- Design enterprise architectural roadmaps and AI-integrated DevSecOps CI/CD/CT pipelines leveraging automated testing frameworks and intelligent delivery methodologies.
- Architect multi-platform tooling integrations across GitHub, GitLab, Azure DevOps, and hybrid enterprise clouds on AWS and Azure.
- Lead Generative AI enablement across engineering squads, coaching developers on GitHub Copilot, GitLab Duo, and Microsoft 365 Copilot to accelerate feature velocity by 34%.
- Embed continuous shift-left security governance utilizing SAST, DAST, and SCA tools (GitHub Advanced Security, SonarQube, Trivy, Burp Suite, Black Duck) with automated pull request quality gates.
- Standardize Infrastructure as Code (IaC) module architecture and multi-environment provisioning using Terraform, Ansible, and CloudFormation.

Senior DevOps Engineer / DevOps Engineer — Amdocs

Jan 2022 – Aug 2026

Pune, India (Senior DevOps Engineer: Jun 2024 – Aug 2026 · DevOps Engineer: Jan 2022 – Jun 2024)

- Architected centralized DevOps enablement and observability platforms supporting 60+ enterprise managed services across multi-region Kubernetes clusters.
- Reduced incident detection time (MTTD) by 70% by designing unified Prometheus and Grafana alerting systems monitoring replication health and capacity thresholds.
- Engineered 17+ automated CI/CD pipelines using Python, Bash, and Jenkins Shared Libraries for compliance verification and automated cloud deployments.
- Reduced reported vulnerabilities by 40% by establishing SonarQube quality gate thresholds and Nexus artifact governance across 20+ enterprise applications.
- Led production disaster-recovery (DR) replication simulations and blameless Root Cause Analysis (RCA) to maintain 99.98% platform reliability SLA.

PROFESSIONAL EXPERIENCE (CONTINUED)

Associate DevOps Engineer / Programmer Analyst — Cognizant

Nov 2019 – Jan 2022

Pune, India

- Automated Jenkins CI/CD deployment pipelines, reducing manual deployment overhead by 60% across business-critical enterprise releases.
- Integrated Splunk log monitoring with ServiceNow incident management workflows, accelerating incident response and guaranteeing strict SLA compliance.
- Authored automated Python and Bash maintenance scripts to eliminate repetitive operational toil, improving incident resolution time by 40%.

FEATURED ENGINEERING PROJECTS

Operations Dashboard

FastAPI · Kubernetes · Docker · Chart.js · Observability

Unified platform operations single-pane-of-glass providing real-time pod health analytics, MCP microservice metrics, and rate-aware alerting with zero-credential demo mode. Repository: github.com/shubhs248/Operations-Dashboard

DevOps LearningHub & LabSensei

Kubernetes · Terraform · Ollama · Chroma · Streamlit · Local RAG

12-lab enterprise practice suite spanning Linux, Docker, K8s, and Terraform; paired with LabSensei, an offline AI tutor leveraging local RAG and SM-2 spaced repetition algorithms. Repository: github.com/shubhs248/DevOps-LearningHub

CERTIFICATIONS & EDUCATION

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services · Valid through May 2027 (Credly Verified)

Microsoft Certified: Azure Fundamentals (AZ-900)

Microsoft (Credly Verified)

EDUCATION

Post Graduate Program in Cloud Computing

Great Learning · 2025

Bachelor of Engineering (B.E.), Electronics & Communication

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV) · 2014 – 2018
